About me

As an architect, I have always had a strong interest in urbanism and landscape. This passion, combined with a deep concern for both environmental and social needs, led me to pursue a Master's degree in Gender and Social Studies. I aim to ensure that my projects are not only sustainable but also inclusive, responding to the diverse challenges that our cities and communities face today.

Professional Experience

Freelance Architect (02/2025 – Present)

- Collaborating on community engagement and participatory planning projects alongside multidisciplinary teams of architects, urban planners, artists, environmental specialists, and public institutions. Supporting processes that shape the future of parks, public spaces, and urban environments across Barcelona and other municipalities, while ensuring that local knowledge and community needs are integrated into planning and design decisions.
- Since 2021, organizing and leading exploratory urban walks and participatory workshops with residents, students, professionals, community groups, and technical teams. Through collaborations with universities and institutions in Sion, Geneva, Fribourg, Lausanne, and Zurich, these activities have helped identify local challenges and opportunities while promoting community engagement in the planning and design of the built environment.
- In 2026, leading a citywide public engagement program as part of the Barcelona World Capital of Architecture initiative, organizing monthly urban walks across all city districts and participatory workshops with children to promote civic engagement and awareness of the urban environment.
- Cofounder and developer of a civic engagement platform designed to strengthen citizen participation in urban decision-making and enhance collaboration and communication between communities and local governments. The platform is publicly available on the [App Store](#).

Equal Saree, Barcelona, Spain (2024 - 2025)

- Led participatory processes: engaged communities in urban planning transformation through workshops, including a review of public spaces and parks in Centelles and the improvement of Rambla Catalunya in Olesa de Montserrat.
- Developed new methodologies with feminist and inclusive approaches to urbanism and architecture, ensuring projects addressed diverse needs and promoted equity.

Arqbag SCCL, Sant Cugat del Vallès, Spain (2024)

- Designed and facilitated interactive educational workshops introducing children to architecture and urbanism, encouraging creativity, spatial awareness, and a deeper understanding of the built environment.
- Led the full lifecycle of public grant applications, from identifying funding opportunities and preparing successful proposals to securing funding and managing project implementation. Coordinated and delivered funded initiatives in collaboration with the Barcelona City Council.

DV& architectes, Sion, Switzerland (2022 - 2023)

- Contributed to the planning and redesign of key public spaces in the city of Sion, working in close collaboration with municipal authorities on major urban regeneration projects, including the Central Station Plaza.

Mijong architecture & design, Sion, Switzerland (2019 - 2022)

- Led the development of urban planning and design projects for several neighborhoods, including initiatives in Bern, Sierre, and Zurich, from early strategic planning through detailed design stages.
- Managed projects throughout their full lifecycle, overseeing design development, budgeting, procurement processes, consultant and contractor coordination, and construction site supervision to ensure successful project delivery.
- Spearheaded the implementation of a new BIM methodology across the firm, developing internal workflows and delivering training programs for both junior and senior architects to strengthen digital design capabilities and improve project coordination.
